Inspection  
Type: ROUTINE INSPECTION  
Date: MAY-04-2006

3.6 ( a )( 2 )

PRIMARY ENCLOSURES.

Primary enclosures must be constructed and maintained so that they have no sharp points or edges that could injure the dogs.

\*\*\*Several of the dog resting boards are chewed along the front edge creating a rough and/or sharp edge. Primary enclosures should be maintained to prevent sharp edges that may injure the animals. The resting boards with sharp edges must be replaced. A system for the routine replacement of dog resting boards should be developed and/or options to minimize chewing damage should be explored. Correct by June 4, 2006.
